Operator initials

----------------------	----------------------	----------------------	----------------------	----------------------	----------------------	----------------------

Defects found and action taken

Date · defect · reported to · action / repaired by

Found a defect? Report it straight away, and do not use the machine until it has been made safe.

This is a general guide to daily pre-use checks. Always follow the manufacturer's operator handbook and your employer's procedures, which take priority over this sheet. Free to print and use.
